

SO, WHY CHOOSE **vetted better.**

The VETTED BETTER team has an extensive background and network in cannabis and hemp manufacturing. This has connected us with thousands of lab professionals dating back to 2011, from Level I Technicians to C-Suite positions, and everything in between. Let us use these relationships to deliver the RIGHT FIT for YOUR LAB.

The lab space includes a wide variety of end products and objectives, and even wider variety of equipment and proficiencies. When hiring a new employee, it's imperative that you have a knowledgeable Employment Partner who remains current to these conditions and variables. That partner is VETTED BETTER.

Wrong hires can set a facility back - money and time. For many labs, hiring becomes an overwhelming process. VETTED BETTER uses better data points, better intake methods, and a team of lab experienced talent search specialists to find the RIGHT NEW HIRE for YOUR LAB.
